

OUR BELIEF

Successful outcomes are more likely when children and youth are treated in the context of their families and the communities in which they live.

A Community Based Mental Health Center

Children, Youth, and Family Programs

**An integrated approach to treating children
and their families.**

Together we can make a difference!

A Message from the ALM Hopewell Family

On January 1, 2010, ALM Hopewell Center joined the family of Betty Jean Kerr People's Health Centers (PHC) to provide expanded and improved services to St. Louis City and County residents. By forming this collaborative partnership and others, ALM Hopewell is stronger and more vibrant than ever; providing a full menu of holistic care for St. Louis City and County youth. We look forward to working with families and the community to improve the well-being of our children and youth. We welcome you!

Expanded and Improved Services

- A more child friendly environment
- Increased psychiatric hours for children
- Waiting area for families with children
- Direct linkages to chronic and preventive health care
- Partnerships with schools, juvenile courts, hospitals, and Children's Division
- A streamlined registration, intake and assessment process

PROGRAM SERVICES

In 2007, the Missouri Department of Mental Health reported that the percentage of children, ages 2—17, with emotional, developmental, and behavioral problems receiving mental health care, including counseling, was 74% compared to a national percentage of 60%. ALM Hopewell Center provides much needed comprehensive, mental health services with medical support. Through collaboration and coordination, the emotional and behavioral needs of our troubled youth are effectively addressed.

Kerr People's Health Centers

Eligibility for Services

- School-age children and youth
- Serious Emotional Disturbances (SED)
- Behavior Disorders

Program Benefits and Desired Outcomes

Clients are accepted as individuals and treatment is geared to meet their unique circumstances. Family and community strengths and assets are the basis for treatment planning and service delivery. Family and community engagement are seen as critical to achieve successful outcomes that children, youth, and their families can sustain.

Strengthening of Families

- Family reunification
- Promote healthier family relationships
- Reduce children out of home placement

Building Strong School and Family Partnerships

- Together help children and youth improve their classroom behaviors
- Together help students increase days in school
- Together help students access resources to improve their academic performance

Thriving through Collaborative Community Initiatives

- Work with community resources to meet individual family needs
- Access to resources that enable children and families to make positive changes
- Linkage to resources with a track record of helping families with multiple needs

Achieving Health and Wellness

- Educate families about the connection between physical and mental health
- Refer for ongoing medical and well care services (e.g., immunizations, physicals)
- Teach families about nutrition and the value of physical activity for healthy living
